

Seacliff and New Brighton State Beaches Recovery Process

1

Assess Vulnerability

Study and identify local coastal processes. Model changes with best available science. Identify vulnerable assets and source of vulnerability.

We Are Here

2

Identify Adaptation Measures

Identify what types of adaptation solutions would work well to reduce vulnerability and support local coastal processes.

3

Envision Desired Future

Develop a desired vision of the future that meets the needs of Californians.

Seacliff and New Brighton State Beaches Recovery Process

4

Planning and Permitting

Informed by the vulnerability analysis, plan, design and permit adaptations that meet the needs of Seacliff considering extreme weather and climate change.

5

Implementation

On-the-ground execution of projects requiring permitting.
